

pressure reduction valve

type HPI 08

3-HPI 08

valve type with pilot valve

control valve manuel externally controlled

pressure range PN 0-200 bar orifice DN 8 mm connection thread function manual

stepless pressure regulation

Above stated body materials refer to the valve port connections that get in contact with the media only! design externally controlled with spring return

body materials (1) brass 2

(5) 3 6

valve seat synthetic resin on metal

seal materials NBR

weight

control

additional equipment

details needed for main valve

- orifice
- port
- pressure regulating range
- flow rate
- media
- media temperature
- ambient temperature

details needed for pneumatic actuation

- nominal voltage
- type of protection
- actuation pressure range min/max

	general specifications		options
ports	HPI	threads G 3/8	
function		stepless regulation	
ressure regulation range	bar	10-200	
Kv value	m³/h	max. 1,3	
media		gaseous - liquid	
abrasive media			
flow direction	A ⇒ B	as marked	
operating time	ms	< 100	
media temperature	°C	0 to +60	
ambient temperature	°C	0 to +50	
approvals			
mounting			

	electrica	l specifications	options	
nominal voltage	Un	24 V DC	special voltage upon request	
	Un	230 V 50 Hz AC	special voltage upon request	
power consumption	DC	4,8 W	2,5 W	
	AC	pick up 11,0 VA holding 8,5 VA		
protection	IP 65 (P54)	acc. DIN 40 050		
energized duty rating	ED	100%		
connection		plug acc. DIN EN 175301-803 form B		
additional equipment		illuminated plug with varistor		
optional	M12x1	connector acc. DESINA	connector acc. VDMA	
coil		3 positions x 90° / wire diameter 6-8 mm		
max. temperature	media	60°C		
	ambient	50°C		
explosion proof	EEx m II T5	nominal voltage Un	direct current 24 V 3,25 W	
		power consumption	alternating current 230 V 50 Hz 2,90 W	

The valves' technical design is based on media and application requirements. This can lead to deviations from the general specifications shown on the data sheet with regards to the design, sealing materials and characteristics.

If order or application specifications are incomplete or imprecise there exists a risk of an incorrect technical design of the valve for the required application. As a consequence, the physical and / or chemical properties of the materials or seals used, may not be suitable for the intended application.

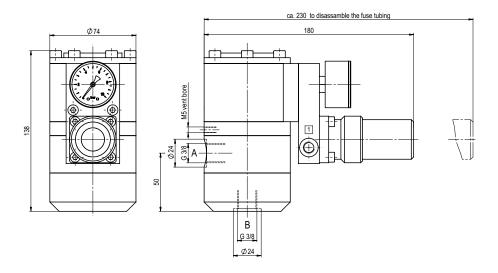

pneumatic specifications

options

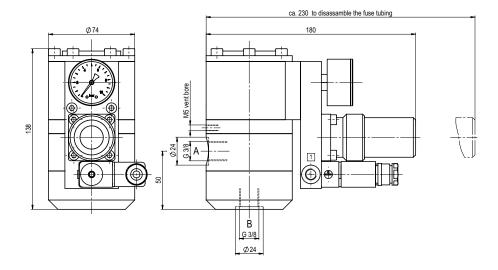

see actuation pressure-diagram DIN ISO 8573-1 grade of compressed air quality 5/4/3 air consumption preferably 3/2-way pilot valve during low pressure circulation mode actuator ports

specifications not highlighted are standard specifications highlighted in grey are optional

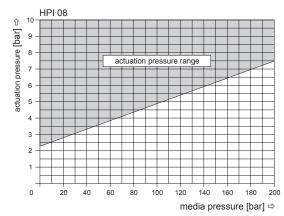

type HPI 08

type 3-HPI 08

actuation pressure-diagram

The application-specific layout relating to temperature, pressure conditions, switching behavior, media and its consistency may restrict the range of use or necessitate relevant modifications to materials used and seal arrangements.
